### Skills

I am a young, vibrant and multilingual individual with an extensive amount of self-confidence and charisma. Well known for my leadership skills, and kind nature, with the ability to not only multitask but to work with a diverse group of people.

A outspoken individual who can encourage and motivate people to be the best versions of themselves. A considerate amount of knowledge in computer literacy and coding, good with microsoft word, excel, powerpoint and publisher. Thus being a individual who approaches problems with the skills such as design, strategic and critical thinking. With the ability to work with others for he has empathy, good communication skills and servant leadership (which is do lead from behind not in front). I also have gained skills such as research, public speaking, and sharp thinking skills. I have also attained hard skills such as: HTML, CSS, SCSS, JS, NodeJs and JQuery

---

### Experience

#### Action Volunteers Africa / Volunteer

Feb - Nov 2018, Wynberg

I was a volunteer at AVA, I was part of five person group (school group) where we were assigned to tutor at Leiden Secondary School (in Delft) for a year. During that year, I was part of a 10 person group (innovation group) where we had to work together to combat a series of innovation challenges throughout the year.

---

### Education

#### Life Choices Academy/ Web Development

Nov - April 2019, Lansdowne

We were taught web development languages, and we were taught others such as professional development, life skills and mindfulness.

#### Delft Technical High School / National Senior Certificate

2013 - 2017, Delft

This is where I did my high school at, I did Mechanical Technology thus I know how to weld, cold bending , etc.

---

### Awards

#### Social Innovation Challenge #1,#2 and #3

105 Young people pitched their solutions to one of our wicked problems, the inability of more than three-quarters of our youth to read with comprehension. They presented ideas of how we as a nation can build a culture of reading.
